Summary

Software Engineer with **2.5 year** experience in building scalable web applications and backend systems using **Java, Spring Boot, React.js, and Kafka**. Skilled in performance optimization, microservice architecture, and full-cycle software development. Experienced in collaborating with cross-functional teams to deliver features for enterprise SaaS platforms, including **EMS, Propel, and Travel SVC**. Knowledgeable in clean code practices, design patterns, and system reliability.

Skills

Programming Languages	Java , JavaScript
Frameworks	Spring Boot , React.js, Redux-Saga
Databases	SQL, DBMS, PostgreSQL , JPA
Tools	Kafka , Git, Postman, Jira, CloudWatch, Oodle, S3
Concepts	Data Structures & Algorithms, OOP, Design Patterns , Microservices, REST APIs

Work Experience

Software Engineer, Zagggle Prepaid Ocean Services Ltd Apr 2023 – Present

- **Travel SVC (06/2025 – 09/2025)**
 - Architected and deployed a **Kafka-based notification service**, enabling scalable, real-time alerting across systems.
 - Orchestrated backend event handling with Kafka, reducing event processing latency by **30%** and improving system responsiveness.
- **Expense Management System — EMS (10/2024 – Present)**
 - Designed and launched a high-throughput email service, supporting **10,000+ users** with **99.9%** reliability.
 - Diagnosed and resolved production issues, lowering incident frequency by **40%** and improving platform stability.
 - Migrated a business-critical module from **Ruby on Rails** to **Spring Boot**, cutting response times by **50%** and reducing technical debt.
 - Optimized APIs to achieve **10x** faster response times for high-traffic endpoints.
 - Created backend logic for expense claims with SQL-driven policy enforcement, reducing manual errors by **25%**.
 - Engineered microservices using design patterns (**Singleton, Factory**), enhancing scalability and cutting maintenance effort by **20%**.
 - Enhanced mobile OTP login, improving authentication security and reducing login failures by **35%**.
 - Designed **Proxy Login** functionality for internal teams, reducing debugging and support turnaround time by **40%**.
 - Integrated **Mobileware payment gateway** with QR scan support, enabling secure digital payments and reducing transaction time by **60%**.
 - Gained strong understanding of the complete **session-based login lifecycle**, from authentication to session expiry.
- **Propel — Rewards & Recognition Platform (04/2023 – 10/2024)**
 - Built **role-switch functionality** between user and admin, improving flexibility and reducing administrative overhead by **15%**.
 - Delivered end-to-end solutions using **React.js** and **Redux-Saga**, improving UI responsiveness and boosting user engagement by **40%**.
 - Engineered backend APIs handling **50,000+** monthly requests, ensuring seamless data flow across services.
 - Collaborated with enterprise clients to customize platform features, increasing adoption by **25%**.

Education

2019 – 2023 Bachelor of Engineering in Computer Science and Engineering
KLS Gogte Institute of Technology, Belagavi
CGPA: **9.05/10.0**; Technical Head (ACE), 2021–22

Certificates

- **Java Full Stack Development**, Simplilearn (2023)
- **The Complete 2021 Web Development Bootcamp**, Udemy (2023)
